

## IN SCHOOL

### A mythological journey

This year, The Newtown School celebrated their Annual Day programme in the magnificent auditorium of Science City amidst the honourable chief guest Padma Shri Arunima Sinha. She is the first female amputee and also the first Indian amputee to climb Mount Everest.

Ms Sinha has already conquered five of the world's highest peaks with her bravery and perseverance. The event was attended by the founding directors and principals of several reputed schools in Kolkata. The programme began with the welcome song followed by an insightful and heartening speech by Ms Sinha. She shared the power of humbleness and persistence in our life with the audience, enlightening us with her inspiring story.

She believes that establishing a goal in life is the most important thing and advised the young generation to use their weakness as their weapon during the struggles of life instead of losing hope. Later, the principal unveiled the treasure of achievements that the school has collocated during the year. The Nature and Mythology themed event was glorified by the skit played by the Pre-Primary students on the epic 'Ramayana'. The event ended with a beautiful presentation on environment consciousness titled Prakriti- A Beckoning Call.
